

ATISH PATEL

Php Developer

+91 81608-82816 @ patelatish2001@gmail.com Navsari, Gujarat, IN

SUMMARY

Motivated BCA graduate with an MCA degree and 6 months of hands-on internship experience in software development, project management, and collaborative teamwork. Driven to apply my academic background and practical skills to contribute effectively to a forward-thinking software development team, eager to grow and make an impact in IT

EXPERIENCE

Lead Php Developer

mResultados 08/2024 - 10/2024 Dombivali, MH

Mresultados is an IT and marketing company specializing in digital marketing, PPC, email marketing, and graphic design, offering tailored solutions to boost online presence and brand growth.

- Managed URL redirections in CodeIgniter to improve site navigation and user experience.
- Developed custom frontend components as per requirements, optimizing site performance for faster load times.
- Enhanced user interactions by refining the overall interface design.
- Built contact and project pages in Laravel for the company website, ensuring functionality and responsiveness.

Php Web Developer

DigiFarm Technologies 12/2023 - 04/2024 Navsari, GUJ

- Developed the CRM functionality in CodeIgniter, enabling certificate approvals and tracking pending tasks.
- Managed client data integration, including features to track client numbers and profit metrics.
- Designed and implemented the frontend, creating a user-friendly interface for seamless navigation.

PROJECTS

React JS Job Portal

05/2024 - 07/2024 Navsari, IN

Created a React.js job portal with JSON backend, supporting job search, filtering, and real-time data updates

- Built a job portal using React.js with JSON as the backend, managing data for job listings, user profiles, and applications.
- Implemented dynamic search, filtering, and CRUD operations to enhance user experience and enable real-time updates.

Bus Booking

01/2022 - 03/2022 Navsari, IN
https://github.com/A30Patel/bus_booking

Built a PHP-based bus booking system with MySQL, including CRM features for managing schedules, bookings, and customer data.

- Developed a PHP bus booking system with a MySQL backend to manage schedules, bookings, and cancellations.
- Integrated a CRM module for customer data management and admin support, streamlining booking monitoring.
- Designed user features for bus search, schedule viewing, and reservations, optimizing the booking process.
